GOVT.

6) Returned, with compliments, to the Secretary to Government, Local and Legislative Departments, with the intimation that no separate establishment was sanctioned for the surveys referred to in the late Sanitary Division prior to the Reorganization of the Public Works Department in September 1922. That Division had a number of subordinates and Overseers as also Engineer Officers who were looking after the Sanitary works and new water supply schemes and any surveys of towns. Since the Public Works Establishment was considerably reduced in September 1922, the present Water Supply Construction Division has been allowed only one Overseer and six Suboverseers for supervising sanitary works such as drainage, etc. There is, therefore, no establishment available for Town surveys and it is recommended now that an establishment consisting of 4 Suboverseers, a Draftsman, a clerk and two peons under an Overseer may be employed in place of an Assistant Engineer and 2 Suboverseers sanctioned by Government in Government Order No. $\frac{L\ 1364-82}{Rl\ 94-24-1}$ dated $\frac{15}{21}$ August 1924

MYSORE PUBLIC WORKS DEPARTMENT,
CENTRAL OFFICE,

Dated Bangalore 3rd September 1924.

GENERAL REVENUE SECRETARIAT
2785
10. NOV. 1924.

From J.Bhore,Esq., A.M.I.C.E.,
Chief Engineer of Mysore, Bangalore.

To

B. Venkatapaiya, Esq.,Bar-at-Law,
Secretary to Government,
Local & Municipal Department,
Bangalore

Sir,

Adverting to G.O.No.L.1364-82/Ml.94-24-1 dated the 18th 21st August 1924 sanctioning the appointment of an Assistant Engineer with two Subovorseers for work connected with the sanitary and town planning schemes of Local Bodies, I have the honour to inform you that much cannot be done with the help of two Subovorseers and for supervising the work of these two subordinates, the services of an Engineer officer are also not necessary.

2. The minimum number of subordinates required will be four, if two towns at least are taken at a time. The nature of this work also requires that a number of drawings such as survey plans, designs for extensions and other type designs for houses, latrines, cattle sheds,&c., will have to be drawn, traced, copied and supplied to the various Local Bodies. To do all these, the services of a Draftsman are quite essential. There will be much correspondence with the local bodies in matters relating to sanitation, town improvements and other allied subjects. All these papers cannot be attended to with the existing establishment of the Water Supply Construction Division, which has only four clerks. A clerk will also be necessary for correspondence work.

The

The survey work itself may be placed under the supervision of an Overseer well conversed with the nature of this kind of work and the services of an Engineer officer for such a small establishment is unnecessary. The work will be carried out under the instructions of the Executive Engineer, Water Supply Construction Division.

3. I would therefore suggest the entertainment of the following establishment for the work in lieu of the one now sanctioned by Government:

| | | |
|---|---|---|
| 1 Overseer | Rs 100-10-150 | Rs 1,600 per year. |
| 4 Suboverseers | Rs 35-5/2-80 | Rs 2,808 " |
| 1 Draftsman | Rs 35-3-50 | Rs 555 " |
| 1 Clerk | Rs 30-3-45 | Rs 495 " |
| 2 Peons | Rs 11 each | Rs 264 " |
| | | Rs 5,722 |

The cost is about the same as that sanctioned by Government viz., Rs 5,584.

4. The favour of early orders is solicited.

I have the honour to be,

Your most obedient servant,

7.4.24

Chief Engineer of Mysore.
